## Honeywell Prescribes Pro-Watch® to Secure Major Teaching Hospital

Jersey Shore University Medical Center has a solid reputation for providing the most advanced healthcare in central New Jersey. With more than 300 people coming and going daily on the 26-acre campus, Jersey Shore needed a security solution that would integrate seamlessly with the CCTV and the infant abduction systems already in place. They turned to integrator Service Works, Inc. to install Honeywell's Pro-Watch® security management system to protect their students, staff and patients. Now Jersey Shore can teach and serve the community knowing that its fully integrated access control, digital video and intrusion systems are in place to protect everyone on campus.
